English
Upper-Intermediate

HOBBIES

Theatre
With numerous experiences in theater stages, I have gained the ability to be relaxed in front of a crowd.

Basketball
Through playing basketball, I have developed a deep understanding of crucial aspects of collaboration.

SUMMARY

Enes is a Junior Frontend Developer. He has a passion for continuous learning to improve his tech stack. Enes is actively pursuing the basics of Micro Frontends, showcasing his commitment to professional growth.

Enes is known by both his colleagues and academic instructors for his curious nature and problem-solving approach. His biggest motivation in his career path is success.

EDUCATION

Bachelor Degree of Computer Engineering, Istinye University
November 2018 – (Expected Graduation is September 2023)
Istanbul, Turkey
GPA: 3.49

PROJECTS

Personal Website
August 2023 – present
The main goal of this project is to create a personal website for me. To achieve this, I am utilizing **Next.js** for efficient static site generation. I am also using **TypeScript** for **static type checking**. Additionally, I am paying attention to the visual details by incorporating **CSS Modules** to achieve a refined and elegant styling.

E-Commerce Web Application
September 2022 – August 2023
The heart of our project was to design a web application that not only cares about the usability but also offers a welcoming user interface. During the development phase, we carefully equipped powerful tools such as **React**, **React Router**, and **Axios**, all of which combined to create a user-intuitive Front-End experience. Also, we introduced **Styled Components** to provide sophisticated styling for our application.

PROFESSIONAL EXPERIENCE

Avcılar Municipality, IT department, Intern
November 2022 – March 2023 | İstanbul, Türkiye
Collaborating with our team, we brainstormed solutions to handle different technical problems that users encountered, such as network problems and glitches with peripheral devices. I also had the opportunity to expand my knowledge of setting up basic networks. Lastly, I played an active role in contributing to the troubleshooting processes during my internship.
